Graded ICA201 – BinarySearch

CS 244

Graded In-Class Assignment: BinarySearch

- Download the files:
  - ICA201_BinarySearch.cpp
  - ICA201_data.txt

- Modify/Correct the CPP file so it
  - reads integer values from a file,
  - sorts them,
  - and then can do a search for a hard coded value

- Test your results
  - Compile it, Run it
  - When satisfied with it (or out of time) upload the resulting FIXED code to the appropriate D2L dropbox

- You can work in groups
  - BUT each individual must submit something to D2L
