

CS 545 Webpage Introduction Assignment

Materials Due: September 22, 2015, 8:00 AM

All items and details (dates, typo fixes...) subject to change – always check with instructors, and watch the deadlines for dropboxes in D2L (Learn@UW-Stout)

Overview

Establish an ability to create a basic webpage (an HTML file).

Details

Create an html (text) file that ends with the extension “.html”

- **For content**
 - Select a digital image processing topic that interests you
 - Find textual information about the topic
 - Find graphical information about the topic
 - Find 5 good websites or webpages that provide more information on the topic
- **Combine the materials you find into a webpage**
 - Use HTML formatting (type the file by hand) to combine the material
 - Incorporate the material you found into a cohesive and visually pleasing finished page
- **Requirements**
 - Topic of page must relate to digital image processing
 - Must have some text
 - HTML should be formatted in a human legible way
 - Display of page information must be formatted in human legible/pleasing way
 - Must have at least one image
 - Must have at least 5 links to related pages

Turn-In (to the appropriate D2L dropbox)

The finalized “page”

Minimally this should be 2 files:

The HTML file and 1 image file

Optionally you may also use javascript and css and additional images

Thus there may also be additional files

Zip all files together before turning them in.

Be certain when unzipped the page will display correctly by double clicking on the html file.

Page should display correctly using any web browser

Likely Firefox or Chrome (maybe Safari) will be used for grading
